DETAILED ACTION

Prior Art Rejections

Statutory Basis

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The Rejections

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Liao et al.

Liao disclose a method of fabricating a CBICMOS integrated circuit comprising:
(1) forming in a single implantation step a base region of a bipolar transistor (24) and a p-well (24) of an n-channel MOS transistor; forming in a single implantation step a collector contact well (4) of a bipolar transistor and an n-well (8) of a p-channel MOS transistor (note column 4 lines 4-42. Figures 1, and 2).

Allowable Subject Matter

Claims 2-5 are allowed.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Applicants agree that the Prengle does not teach "forming in a single implantation step a collector contact well of a bipolar transistor and an n-well of a p-

channel MOS transistor." However, Liao disclose a method of fabricating a CBICMOS integrated circuit by forming in a single implantation step a base region of a bipolar transistor (24) and a p-well (24) of an n-channel MOS transistor; forming in a single implantation step a collector contact well (4) of a bipolar transistor and an n-well (8) of a p-channel MOS transistor (note column 4 lines 4-42. Figures 1, and 2).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Liao disclose a method of fabricating a CBICMOS integrated circuit.
